Contents of Volume 19

Number 1

	1	Highlights
	3	Editorial *F. Brown*
	5	Essay competition announcement
Papers	7	American National Missile Defense System *P. Arcus*
	15	A new role for a new millennium? The changing nature of space activities *X. Pasco*
	23	Public good or commercial opportunity? Case studies in remote sensing commercialization *S. Johnston & J. Cordes*
	33	The use of remote sensing satellites for verification in international law *J.K. Hettling*
	41	Finding a 'genuine' space policy for Europe: the European space policy workshop series *K. Madders & J. Wouters*
	47	Space ethics and protection of the space environment *M. Williamson*
	53	International cooperation in space: the AIAA–IAC workshops *G. Gibbs & I. Pryke*
Reports	63	The Space Policy Summit *C.M. Contant*
	67	Education curricula of the UN-affiliated regional Centres for Space Science and Technology Education *H.J. Haubold*
	71	Letter to the Editor
	73	Book reviews
	77	Publications
	79	Calendar

Number 2

	81	Highlights
Viewpoints	83	Towards one captain on the European spaceship—why the EU should join ESA *F. von der Dunk*
	87	Humans versus robots for space exploration and development *A. Ellery*
	93	A code of ethics for conducting business in outer space *D. Livingston*
Papers	95	Achieving GPS–Galileo interoperability: the challenges ahead *W.F. Blanchard*

doi:10.1016/S0265-9646(03)00077-8

101 Reorganization of the space development structure in Japan
T. Godai & M. Sato

111 Encouraging space exploration through a new application of space property rights
L.A. Cooper

119 Policy assessment of the impacts of remote-sensing technology
S. Hitchings

127 Financing of space assets
A.F. dos Santos

131 Ten decisions that could shake the world
M.A.G. Michaud

137 Canada's early space policy development 1958–1974
A.B. Godefroy

Report

143 Satellite remote sensing in aid of development: the Tunis Declaration
R. Abidi

147 Book reviews

151 Publications

153 Calendar

Number 3

155 Highlights

Viewpoint

157 Which future for Europe's space agencies?
W. von Kries

Papers

163 Public opinion polls and perceptions of US human spaceflight
R.D. Launius

177 Setting priorities in US space science
J.K. Alexander

183 What next for China in space after Shenzhou?
S. He

191 A knowledge-based architecture for planning military intelligence, surveillance, and reconnaissance
S.-H. Liao, B.-L. Sun and R.-Y. Wang

203 New roles in space for the 21st century: a Uruguayan view
E.D. Gaggero

Reports

211 Space in Poland — a promising future
J. Ryzenko

215 Promoting research and education in basic space science: the approach of the UN/ESA workshops
H.J. Haubold

221 Education curricula in space science and technology: the approach of the UN-affiliated regional centres
H.J. Haubold

225 Publications

227 Calendar

Number 4

229 Highlights

Viewpoint

231 Is the 'peaceful use' of outer space being ruled out?
M. Cervino, S. Corradini and S. Davolio

Papers

239 *Columbia* and *Challenger*: organizational failure at NASA
J.L. Hall

249 A Herculean task? Economics, politics, and realigning government in the case of US polar-orbiting weather satellites
M.K. Macauley

261 Space for science, enterprise and environment: the UK draft Space Strategy
A. Cooper

265 Global Monitoring for Environment and Security: data policy considerations
R. Harris and R. Browning

277 The Earth Observation Summit: heralding a new era for international cooperation
R. Ohlemacher

283 Public perceptions of the Mars sample return program
R.E. Lofstedt

Reports

293 Current policy issues in remote sensing: report by the International Policy Advisory Committee of ISPRS
R. Harris

297 Space in the UK: something to celebrate?
A. Hansson

299 Book reviews

311 Publications

313 Calendar
